inklayer

PDF Viewer & Annotation SDK for Modern Web Apps

Inklayer is an open-source PDF viewer & annotation SDK. PdfViewer displays documents with pixel-perfect rendering; PdfAnnotator adds highlight, comment, and markup capabilities. Built for React and Vue, it handles coordinate transforms and zoom-level alignment so you don't have to.

Viewer + Annotator

PdfViewer: display & navigate.
PdfAnnotator: markup & comment.
Two components, pick your level.

14 Annotation Types

Highlight, underline, strikeout,
rectangle, ellipse, freehand,
sticky notes, stamps & more

Auto Coordinate Transform

Seamless zoom & scroll.
Annotations stay pixel-perfect
at any scale. Zero manual math.

Why teams choose inklayer

> PdfViewer for display-only -- no annotation baggage when you just need to show PDFs

> PdfAnnotator for full markup -- highlight, comment, stamp, and export in one component

> Framework-native APIs for React hooks and Vue composables

> Customizable UI -- override any component with your own design system

Quick Start Guide

Install the SDK and add PDF viewing or annotation capabilities to your app with just a few lines of code.

Installation

```
# npm           npm install inklayer-react
# yarn          yarn add inklayer-react
# pnpm          pnpm add inklayer-react
```

{ React }

```
import { PdfViewer,
  PdfAnnotator }
  from 'inklayer-react'
import
  'inklayer-react/style'

// Display only:
<PdfViewer
  url="/demo.pdf" />

// Or full annotation:
<PdfAnnotator
  url="/demo.pdf"
  user={{ id: 'me',
    name: "Demo" }} />
```

< Vue >

```
import { PdfViewer,
  PdfAnnotator }
  from 'inklayer-vue'
import 'inklayer-vue/style'

<template>
  <!-- Display -->
  <PdfViewer
    url="/demo.pdf" />
  <!-- Annotate -->
  <PdfAnnotator
    url="/demo.pdf"
    :user="{ id:
      'me', name:
      'Demo' }"
  />
</template>
```

Viewer & Annotation API

`highlight`	Yellow text marker	`underline`	Underline text with color
`strikeout`	Cross out text	`rectangle`	Box area selection
`ellipse`	Circle region highlight	`freehand`	Freeform pen drawing
`sticky_note`	Comment popup notes	`text`	Type text directly
`stamp`	Predefined icon stamps	`line`	Straight line arrow
`polyline`	Multi-point line	`polygon`	Closed shape
`ink`	Smooth freehand path	`signature`	Hand-drawn signature

Use Cases & Architecture

Inklayer powers PDF viewing and collaboration across industries. PdfViewer for display, PdfAnnotator for markup -- here's how teams use it and how the architecture fits together.

Use Cases

D

Document Review

Legal teams, editors, and compliance reviewers mark up contracts and manuscripts with precision annotations.

E

E-Learning

Teachers annotate course materials; students submit marked-up assignments. Feedback stays on the page.

R

Real Estate

Agents highlight floor plans and property documents. Clients sign and annotate directly in the browser.

S

Research & Data

Scientists and analysts annotate charts, papers, and data visualizations for peer review and discussion.
